

*The ESCIN (Numerical interactive creation school) was created to answer to the need of artistic skills in the Virtual Reality field in which Laval plays an important part at the international level. Today it is a visual communication and infographic school with several cycles which trains students to the numerical image professions.*

### Training courses

The school offers college courses in Virtual Reality, counseling, professionalization and specialization in graphics (2D and 3D)

Classes in drawing, artistic culture, communication techniques and graphic creation

The final year is organized around experimental projects focused on new usages of Virtual Reality

### Skills / partners

**Technical skills:** Info graphic, Multimedia, Graphic Art, Game Design, 3D Animation, Web Design, 3D Images, Virtual Reality, Motion Capture

**Partnership** with Tama University and a Laboratory of the University of Quebec in Outaouais

ESCIN is part of the UCO (West Catholic University)
